Data Format for Applied MFN

Source: Integrated Database (IDB) notifications.

Column Number		Column names and notes
(1)	Reporter	
(2)	Year	Year of the applied tariff.
(3)	MFN Tariff Original Nomenclature (Nomenclature of the submitted/processed MFN tariff schedule as stored in the database)	HS code level	Corresponds to HS Code in Col (5); 2 refers to HS chapter, 4 refers to HS heading, and 6 refers to HS subheading.
(4)		Nomenclature	Nomenclature of the submitted/processed MFN tariff schedule as stored in the database.
(5)		HS code	Standard HS 6-digit subheading based on the indicated nomenclature.
(6)	MFN Applied Tariff	Number of subheadings	Number of standard subheadings within the HS code for the specified nomenclature.
(7)		Number of TL	Number of tariff lines in the national nomenclature within the HS code.
(8)		Number of AV duties	Number of national tariff lines in the HS code with Ad valorem duty.
(9)		Average of AV Duties	Average of all ad valorem duties in the HS code. No ad valorem equivalents for non-AV duties are included.
(10)		Minimum AV Duty	Minimum ad valorem duty in the HS code.
(11)		Maximum AV Duty	Maximum ad valorem duty in the HS code.
(12)		Duty Free TL (%)	Percentage of applied duty free national tariff lines in the HS code.
(13)		Number of Non-AV Duty	Number of national tariff lines in the HS code with non- Ad valorem duty.
(14)		List of Non-AV Duties (for HS 6-digit codes only)	All non-ad valorem duties in the HS subheading.
(15)		Exchange Rate NC/US$	Average annual exchange rate of the national currency to the US dollar.
(16)	Imports from World	Value 000 US$	Total imports from the world (calculated as sum from all partners regardless of tariff regime) of products in the HS code, in 000 US$.
(17)		List of Distinct Unit Values (for HS 6-digit codes only)	The unit value is calculated for each different unit of measure indicated based on submitted data on value and quantity of imports aggregated from all reported partners.
(18)	HS code description		Standard HS code descriptions for chapter and heading codes and the self-contained description based on Eurostat's RAMON metadata server for HS subheading codes.

Data format for Applied non-MFN

Note: Country-specific exceptions at the national tariff line level to the common duty rate for some tariff regimes are not included in the calculation of the subheading preferential average duty.

For example, if for one national TL in HS subheading 200410, the GSP duty is 5% but for partner AAA, the applied GSP duty is 3%, this exception to the common GSP duty is not included in the calculation.

Column Number	Column name	Column names and notes
(1)	**Reporter**	Importing country granting the non-MFN tariff regime.
(2)	**Year**	Year of the applied tariff.
(3)	**Tariff Regimes Granted by Reporter (Excluding MFN)**	List of tariff regimes granted by reporter to certain trading partners. It includes the non-preferential General Duty applied to non-WTO members.
(4)	Original Nomenclature (Nomenclature of the submitted/processed tariff schedule as stored in the database) — Nomenclature	Nomenclature of the submitted/processed tariff schedule as stored in the database.
(5)	HS subhdg*	Subheadings listed are only those where the average preferential AV duty is not equal to the average MFN AV duty and there are no non-AV duties within the subheading (i.e., col 13 is zero).
(6)	Number of subheadings	Filler to align columns with those of Applied_MFN worksheet.
(7)	Number of TL	Number of tariff lines in the national nomenclature within the HS subheading.
(8)	Number of AV duties	Number of national tariff lines in the HS subheading with ad valorem duty.
(9)	Average of AV Duties	Average of all ad valorem duties in the HS subheading. No ad valorem equivalents for non-AV duties are included.
(10)	**Preferential Applied Tariff (only at the HS 6-digit level)** — Minimum AV Duty	Minimum ad valorem duty in the HS subheading.
(11)	Maximum AV Duty	Maximum ad valorem duty in the HS subheading.
(12)	Duty Free TL (%)	Percentage of applied duty free national tariff lines in the HS subheading.
(13)	Number of Non-AV Duty	Number of national tariff lines in the HS subheading with non-ad valorem duty.
(14)	List of Non-AV Duties	All non-ad valorem duties in the HS subheading
(15)	Number of TL with duty different from MFN	The count also includes cases where both MFN and non-MFN duties are non-ad valorem even if the duty rates are the same.
(16)	**HS subheading 6-digit description**	Self-contained description based on Eurostat's RAMON metadata server.

Data Format for Applied non-MFN-only Partners

Note: Partner countries/territories who are accorded only the MFN tariff by the reporter are not included in this list.

Column Number	Column names and notes	
(1)	**Reporter**	Importing country granting the non-MFN tariff regime.
(2)	**Year**	Year of the applied tariff
(3)	**Non MFN-only**	Exporting country/territory to which the non-MFN tariff regime is granted by reporter.
(4)	**Tariff Regimes Granted by Reporter** (Excluding MFN which in principle is granted to all WTO members)	It should also be noted that partners who are non-WTO members are not entitled to but can be granted MFN tariffs.

Data format for Concessions Data

Source: Consolidated Tariff Schedules database (CTS).

Column Number	Group	Column name	Column names and notes
(1)	Reporter		WTO Member
(2)		HS code level	Corresponds to HS Code in Col (4); 2 refers to HS chapter, 4 refers to HS heading, and 6 refers to HS subheading.
(3)	Original Nomenclature (Nomenclature of the original/transposed concession tariff schedule stored in the database.)	HS Version	Nomenclature of the original/transposed concession tariff schedule stored in the database.
(4)		HS code	Standard HS 6-digit subheading based on the indicated nomenclature.
(5)	Bound Data	Number of subheadings	Number of subheadings in the standard HS version specified within the HS heading/chapter.
(6)		Binding Status (B/U)	The HS 6-digit subheading is considered bound (B) if all national tariff lines (TL) within the subheading are bound. If there is no bound national TL in the subheading, it is considered unbound (U). If there are both bound and unbound TLs in the subheading, it is considered partially bound (P). For schedules in HS 1996, bound and partially bound subheadings are not differentiated and are both classified as B. For chapter and heading codes, 'B' means all subheadings within the chapter/heading are bound, 'U' means all subheadings within the chapter/heading are unbound. Otherwise the chapter/heading is considered partially bound, 'P'.
(7)		Number of TL	Number of bound national tariff lines in the HS code. It includes "ex" lines or tariff line suffixes, if any.
(8)		Number of AV duties	Number of national tariff lines in the HS code with ad valorem duty.
(9)		Average of AV Duties	Average of all ad valorem duties in the HS code. Ad valorem equivalents for non-AV duties are not included.
(10)		Minimum AV Duty	Minimum ad valorem duty in the HS code.
(11)		Maximum AV Duty	Maximum ad valorem duty in the HS code.
(12)		Duty Free TL (%)	Percentage of duty free bound national tariff lines in the HS code.
(13)		Number of Non-AV Duty	Number of national tariff lines in the HS code with non- ad valorem duty.
(14)		List of Non-AV Duties (for HS 6-digit codes only)	All non-ad valorem duties in the HS subheading. *[For HS 6-digit codes only]*
(15)		No. of TL with SSG	Number of tariff lines in the HS code subject to special safeguards (SSG).
(16)		No. of TL with dutiable ODC	Number of tariff lines in the HS code with other duties and charges (ODC) that are dutiable.
(17)		Average of ODC AV Duties	Average of all ad valorem ODC's in the HS code.
(18)		Number of ODC Non AV Duties	Number of national tariff lines in the HS code with non ad Valorem ODC.
(19)		List of ODC Non-AV Duties	All non-ad valorem ODC's in the HS subheading.
(20)		List of Distinct Present Instruments	All unique WTO/GATT Legal Instruments relating to the present concession on the product, e.g. UR/94 for the Uruguay Round.
(21)		List of Distinct Implementation Years	All unique end years when the present concessions are to be fully implemented.
(22)		Initial Negotiating Rights	List of WTO member(s) holding Initial Negotiating Rights (INRs) on the present concession. (ISO alpha 3-digit codes except for EU)
(23)	HS code description		Standard HS code descriptions for chapter and heading codes and the self-contained description based on Eurostat's RAMON metadata server for HS subheading codes.

Data format for HS Concordance

List of HS 6-digit subheadings with changes between the original nomenclature of the data and the nomenclature selected by the user.

Column Number			Column names and notes
(1)		Nomenclature	Nomenclature of the submitted/processed tariff schedule as stored in the database.
(2)	Original Nomenclature	HS subhdg	Standard HS 6-digit subheading based on the original nomenclature.
(3)		Percentage of concordance	Percent allocation of the HS subheading of the original nomenclature to the corresponding HS subheading of the selected nomenclature. For a subheading in an older nomenclature that was allocated to several subheadings in the succeeding nomenclature, the percentage is simply based on equal share for each of the corresponding subheadings. For changes between two non-successive nomenclatures, the percentage is simply calculated based on the same principle.
(4)	Selected Nomenclature	Nomenclature	Nomenclature selected by the user to which the original data in a diffferent nomenclature are correlated.
(5)		HS subhdg	Standard HS 6-digit subheading based on the selected nomenclature corresponding to the HS 6-digit subheading of the original nomenclature.
